Summary

Detail-oriented Junior React Developer specializing in the React ecosystem, including TypeScript and Next.js. With a strong foundation built through numerous personal projects, excels at developing performant, responsive web applications. Looking to secure a role that offers opportunities for growth and building impactful software.

Experience

Front-End Development Intern, Upskilling Egypt   June 2025 – September 2025

Completed a 3-month intensive training program focused on front-end development and modern web technologies. Worked on real-world projects, collaborating closely with team members using Git and GitHub for version control and workflow management.

- Contributed to multiple production-grade applications in a collaborative environment.
- Strengthened hands-on experience with Git branching, pull requests, and code reviews.
- Improved communication and agile teamwork skills through regular standups and sprint planning.

Education

Bachelor of Science in Computer Science, Higher Technological Institute (HTI) –   Expected June 2027
10th of Ramadan City, Egypt

Projects

QuizWizz   GitHub | Live Demo

A modern quiz application featuring multiple categories, instant feedback, and dynamic results tracking.

- **Tech Stack:** React, TypeScript, Vite, Tailwind CSS, React Query, React Router
- Implemented quiz state management and question fetching using React Query.
- Built a fast, responsive UI with reusable components and Tailwind CSS.
- Deployed via Netlify for seamless access and optimized performance.

Hotel Management System   GitHub | Live Demo

A full-featured hotel management system with portals for guests, registered users, and admins. Handles booking and payment processing through Stripe with an analytics dashboard.

- **Tech Stack:** React, TypeScript, MUI, Context API, React Hook Form, Axios, React Router, Day.js, Recharts, Emotion, Vite
- Integrated Stripe for secure online payments.
- Built an admin dashboard for booking analytics using Recharts.
- Designed responsive UI with MUI and Emotion.

The Wild Oasis   GitHub

A Next.js full-stack application for cabin booking and management. Built with server components and Supabase integration for data handling.

- **Tech Stack:** Next.js (App Router), TypeScript, Supabase, MUI
- Implemented authentication and data persistence with Supabase.
- Created server-rendered pages for optimized performance.
- Structured scalable folder architecture with modern Next.js conventions.

Project Management System (Jira Clone)   GitHub | Live Demo

A Jira-inspired project management tool featuring task tracking, drag-and-drop workflows, and user permissions.

- **Key Features:**

- – Full Authentication & Authorization for Admins and Users
- – Interactive Charts and Analytics Dashboards
- – Draggable Kanban-style Task Lists
- – Fully Responsive Design for all devices
- **Tech Stack:** React, TypeScript, Context API, Bootstrap, HTML5, CSS3

Skills

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Redux Toolkit

Styling: Tailwind CSS, Bootstrap, Material-UI (MUI), Sass, Emotion

Testing: Jest

Tools & Platforms: Git, GitHub, VS Code, npm, Vite

Other: RESTful APIs, Stripe Integration, Agile Methodologies, Kanban, Responsive Design

Languages

English: Fluent   **Arabic:** Native
